

SEISMIC

This welded reinforced steel cabinet rack offers the maximum level of seismic protection for your equipment. It was designed and tested by an independent testing facility to withstand Telcordia's (formerly Bellcore) Zone 4 requirements.

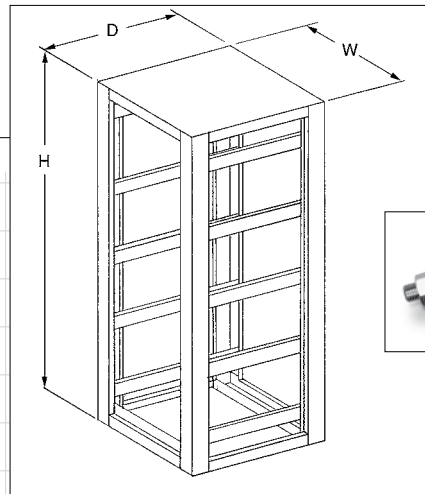

Design Features

- ◆ Tested and certified to Telcordia (formerly Bellcore) #GR-63-CORE specification for an industry leading 1200# equipment load
- ◆ Four fully adjustable 19" panel width mounting rails per EIA-310 requirements
- ◆ All welded and reinforced heavy gauge steel construction
- ◆ Ventilated top for four 4" fans (FN-1280) and one 10" fan (FN-1282)
- ◆ Four 4" diameter cable access holes in the top and one 9.5" square cable access hole in the bottom
- ◆ Optional solid steel side panels, solid steel doors, Plexiglas paneled doors, and certified seismic anchor kits are available
- ◆ Contact the Bud factory or your local Bud rep for other sizes, colors, or modifications

The rack frame can also be incorporated into complete cabinet rack assemblies. These cabinet rack assemblies would consist of any combination of the frame with any or all of the optional accessories.
